

## **Attachment 3. Status of GWMP**

The District is a member of the Northeastern San Joaquin County Groundwater Banking Authority (GBA), which is a Joint Powers Authority. The GBA adopted the Eastern San Joaquin Groundwater Basin Management Plan on September 22, 2004. This Eastern San Joaquin Groundwater Basin Management Plan was adopted under authority of CWC Section 10750 *et. seq.* In addition, the GBA also adopted the Eastern San Joaquin Integrated Regional Water Management Plan on July 25, 2007 which also addresses groundwater management.

The Study would determine whether recycled water could provide an alternative water supply for the basin and support all the goals of the Eastern San Joaquin Groundwater Basin Management Plan, as presented in Chapter 3, Basin Management Objectives, pages 79-80.

The four Basin Management Objectives are listed below:

- Groundwater elevations,
- Groundwater quality,
- Surface water quality, and
- Inelastic land subsidence.

**Attachment 4** describes how the Study will develop alternatives that help to meet each of the four Basin Management Objectives listed above. A copy of the Resolution to Adopt the Eastern San Joaquin Groundwater Basin Management Plan is attached.
